File Code: 1950

Date: November 21, 2001

Hello,

Enclosed is your copy of the Iron Honey Resource Area Final Environmental Impact Statement (EIS). We are providing the public a 30-day review of the document prior to issuing a decision. Any comments must be received within 30 days of publication of the Notice of Availability in the Federal Register (by December 31, 2001).

For the convenience of our interested public and in an effort to conserve paper and reduce publication costs, the documents are available on compact disk (CD), unless a printed copy is requested. This format offers a number of very convenient features. For example, the document is bookmarked so the viewer can easily navigate from one section of the document to another. The viewer can also "zoom" in on maps and other materials, which make them considerably easier to read. I would encourage you to try the CD format if you have access to a computer. If you received a CD but need to have a printed copy, please contact Kerry Arneson at our Fernan Office (208-769-3021). Documents related to this proposal have also been made available to the public on our Forest's internet web page:

<http://www.fs.fed.us/ipnf/eco/manage/nepa>

If you have any questions concerning this project, please feel free to contact Project Team Leader Glenn Truscott or Ecosystems Staff Officer Steve Bateman at (208) 664-2318.

JOSEPH P. STRINGER
