Subject: Quarterly Schedule of Proposed Actions

To: Interested Public

Enclosed is a copy of the Schedule of Proposed Actions for the Idaho Panhandle National Forests. This document provides early notice of Forest Service activities and proposals. The schedule is updated and sent out four times a year.

We invite your active participation in project planning for the Idaho Panhandle National Forests. Contributing your comments, suggestions and site specific information about these project areas early in the planning process can help our forest make better decisions.

Here is how the quarterly Schedule of Proposed Actions can be best used:

1. Look through the schedule to see which projects you would like to know more about.
2. Let the contact person listed for a project know of your interest. The phone number for that person is at the top of the page where the project is listed.
3. We will place your name on the mailing list for that project. You will then be notified about opportunities for public participation and will receive additional information concerning that project as it is developed.

*** You may be on the mailing list for as many individual projects as you like, but please ask to be on the list only for the individual projects in which you are sincerely interested. This will save paper and reduce duplication and mailing costs.

We will continue to provide this quarterly report unless you ask us to remove your name from our mailing list. If you are tracking projects from one quarter to another and notice some are missing, this is because the project was dropped for the time being, or a decision has been issued. Please call the contact person listed on the report if you have questions.

The Idaho Panhandle now has the Schedule of Proposed Actions posted on the FS web at:
www.fs.fed.us/ipnf/eco/manage/quarterlynepa/

If you have comments or suggestions on making this schedule more useful, please contact Steve Johnson at (208) 765-7224.

Sincerely,

DAVID J. WRIGHT
Forest Supervisor

Enclosure

Explanation of Forest Service Jargon

CE - Categorical Exclusion:

Documentation provided for actions where neither an environmental assessment nor an environmental impact statement is required. Actions covered under these do not individually or cumulatively have a significant effect on human environment.

CFR - Code of Federal Regulations:

Formal regulations that implement the Federal Law.

Decision Document & types of NEPA documentation:

A document explaining the decision the Forest Service made. These can be (1) a Record of Decision (ROD) for an EIS, (2) a decision notice (DN) for an EA, and a decision memo (DM) for a Categorical Exclusion (CE). The types of decision documents and NEPA documentation listed are what we believe will be necessary based on past experiences in similar situations but are subject to change depending on the results of scoping and analysis.

Environmental Analysis:

An investigation of a proposed action and alternatives to that action and their direct, indirect, and cumulative effects on the environment. The process provides the necessary information to reach an informed decision and provides the information needed for determining whether a proposed action may have significant environmental impacts.

EA - Environmental Assessment:

A public document for which a Federal agency is responsible that serves to: (1) Provide sufficient evidence and analysis for determining whether to prepare an environmental impact statement or a finding of no significant impact; (2) Aid an agency's compliance with the Act when no environmental impact statement is necessary; (3) Facilitate preparation of a statement when one is necessary. An environmental assessment includes brief discussions of the need for the proposal, alternatives as required by NEPA, the environmental impacts of the proposed action and alternatives, and a listing of agencies and persons consulted.

EIS - Environmental Impact Statement:

A detailed written statement as required by the National Environmental Policy Act.

NEPA - National Environmental Policy Act:

A law that directs Federal agencies to perform environmental analysis.

Scoping:

A term from the NEPA regulations which requires the Forest Service to notify the public and ask for public comment.

Implementation:

Actually doing the project work, including design and preparation.

T48N, R4E, Section 36:

Commonly known as a "legal description," this information is on Forest Service maps and can be used to locate a project: T = Township (north and south), R = Range (east and west), Section = one mile square units of land numbered from 1-36.
