

# **Attachment – Blackfoot**

## **BACKGROUND**

An effort to revise travel management in the Blackfoot was originally initiated during the winter of 2000-2001. At that time the project excluded travel planning in the Poorman and Nevada-Dalton areas of the Lincoln Ranger District (A travel plan had recently been completed for the Poorman area and the Nevada-Dalton area was undergoing travel plan analysis at that time.). A series of public meetings regarding the proposal were held during the winter of 2000-2001. Based on public comments from the original scoping, 2 public-initiated alternatives began to emerge. The Lincoln ATV Club/Ponderosa Snow Warriors and the Wild Divide Chapter of the Montana Wilderness Association submitted comments, initiating the formation of possible alternatives. Other alternatives included the existing condition alternative (no action) and a Forest Service alternative. Several hundred public comments were received in response to the 2000-2001 public scoping process. Now, the Forest is going to include the Poorman and Nevada-Dalton areas in the current travel planning process. The comments generated from the 2000-2001 public scoping and the travel related comments from the Poorman and Nevada-Dalton projects have been retained in our files and have been considered in the development of the proposed action.

## **INTRODUCTION**

The following information includes the specifics of the Proposed Action for the Blackfoot Travel Plan displaying the individual routes and their proposed availability (refer to attached maps).

As described previously in the Scoping Statement, we are defining roads as routes that are available to motorized vehicles consistent with state laws, motorized trails as routes that are available for vehicles 50 inches or less in width, and non-motorized trails as unavailable for motorized users.

In the following tables there is a column that describes the rationale for the proposed restriction. This rationale is specific to each route and directly ties back to the purpose and need of this project. Trails identified with a “U” are user created trails which are all proposed for closure to both motorized and non-motorized use

In addition to the specific road proposals listed in the following tables, three additional road segments need clarification and discussion. Two road systems that access public campground facilities (Copper Creek Campground road #4131 and the Aspen Grove Campground road #1040) are generally open between Memorial Day and Labor Day and restricted during the off-season. This is not a change to the existing condition or a proposal for change, but simply a clarification of the existing situation.

The Mike Horse road #4087 accesses a private home, however the gate that provides a Restricted Yearlong closure to the road is currently located in front of the home. This proposal includes relocating the gate approximately 200 feet behind the home.

**Table 1. Blackfoot Valley North of Highway 200 Motorized Roads and Trails**

The following is the Proposed Action for the motorized roads and trails from north of Highway 200, including the Scapegoat Wilderness. Dual use will be considered for some roads or portions thereof. This table shows restrictions currently in place or proposed to be implemented.

| Road Name & Number         | PROPOSED ACTION            |                              |                     |                            | EXISTING CONDITION         |                              |                     |
