

HELENA NF TRAVEL PLAN COMMENT SHEET

Your Name _____
Address _____

Please submit comments by September 18, 2003. Add additional sheets as needed. If you choose to submit a letter rather than the comment sheet, substantive comments will be most helpful (not votes for or against).

Suggestions for comments that will be most helpful:

- Provide new information pertaining to the conceptual alternatives
- Identify a new issue not addressed in a conceptual alternative or expand upon an existing issue pertaining to the alternatives. In the conceptual descriptions, did we correctly identify the major issues that would drive alternative development? In your view, what is the relative importance of the issues that were identified? Where are various uses most appropriate and where are they most desired? Where are user conflicts occurring and what are your ideas about potential solutions?
- Identify a different way (alternative) to meet the intent (purpose and need) of the conceptual alternative

If you are receiving this mailing, we will retain you on our mailing list for future mailings whether you choose to comment again at this time or not.

1. Do you have any information regarding the alternatives?

2. Are there any mistakes on the alternative maps?

3. Do you have any changes (routes, closures, open dates, etc) to a conceptual alternative that complements the theme of that alternative? Show on map.

4. Is the range of alternatives adequate? If not, what should be added?

5. Is there anything else that you wish us to consider in our analysis?

People who indicated an interest in all of the travel areas should receive alternatives for all three areas. If you indicated an interest in a specific area, we only sent you those alternatives. If you would like additional information on other travel planning areas on the Helena National Forest, please check the appropriate box below.

- Please send me the conceptual alternatives for the South Belts planning area.
- Please send me the conceptual alternatives for the Divide planning area.
- Please send me the conceptual alternatives for the Blackfoot planning area.
