

KOOTENAI NATIONAL FOREST

FOREST PLAN

APPENDIX NINE

LANDOWNERSHIP AND ADJUSTMENTS

Appendix 9

Landownership and Land Adjustments1. Introduction

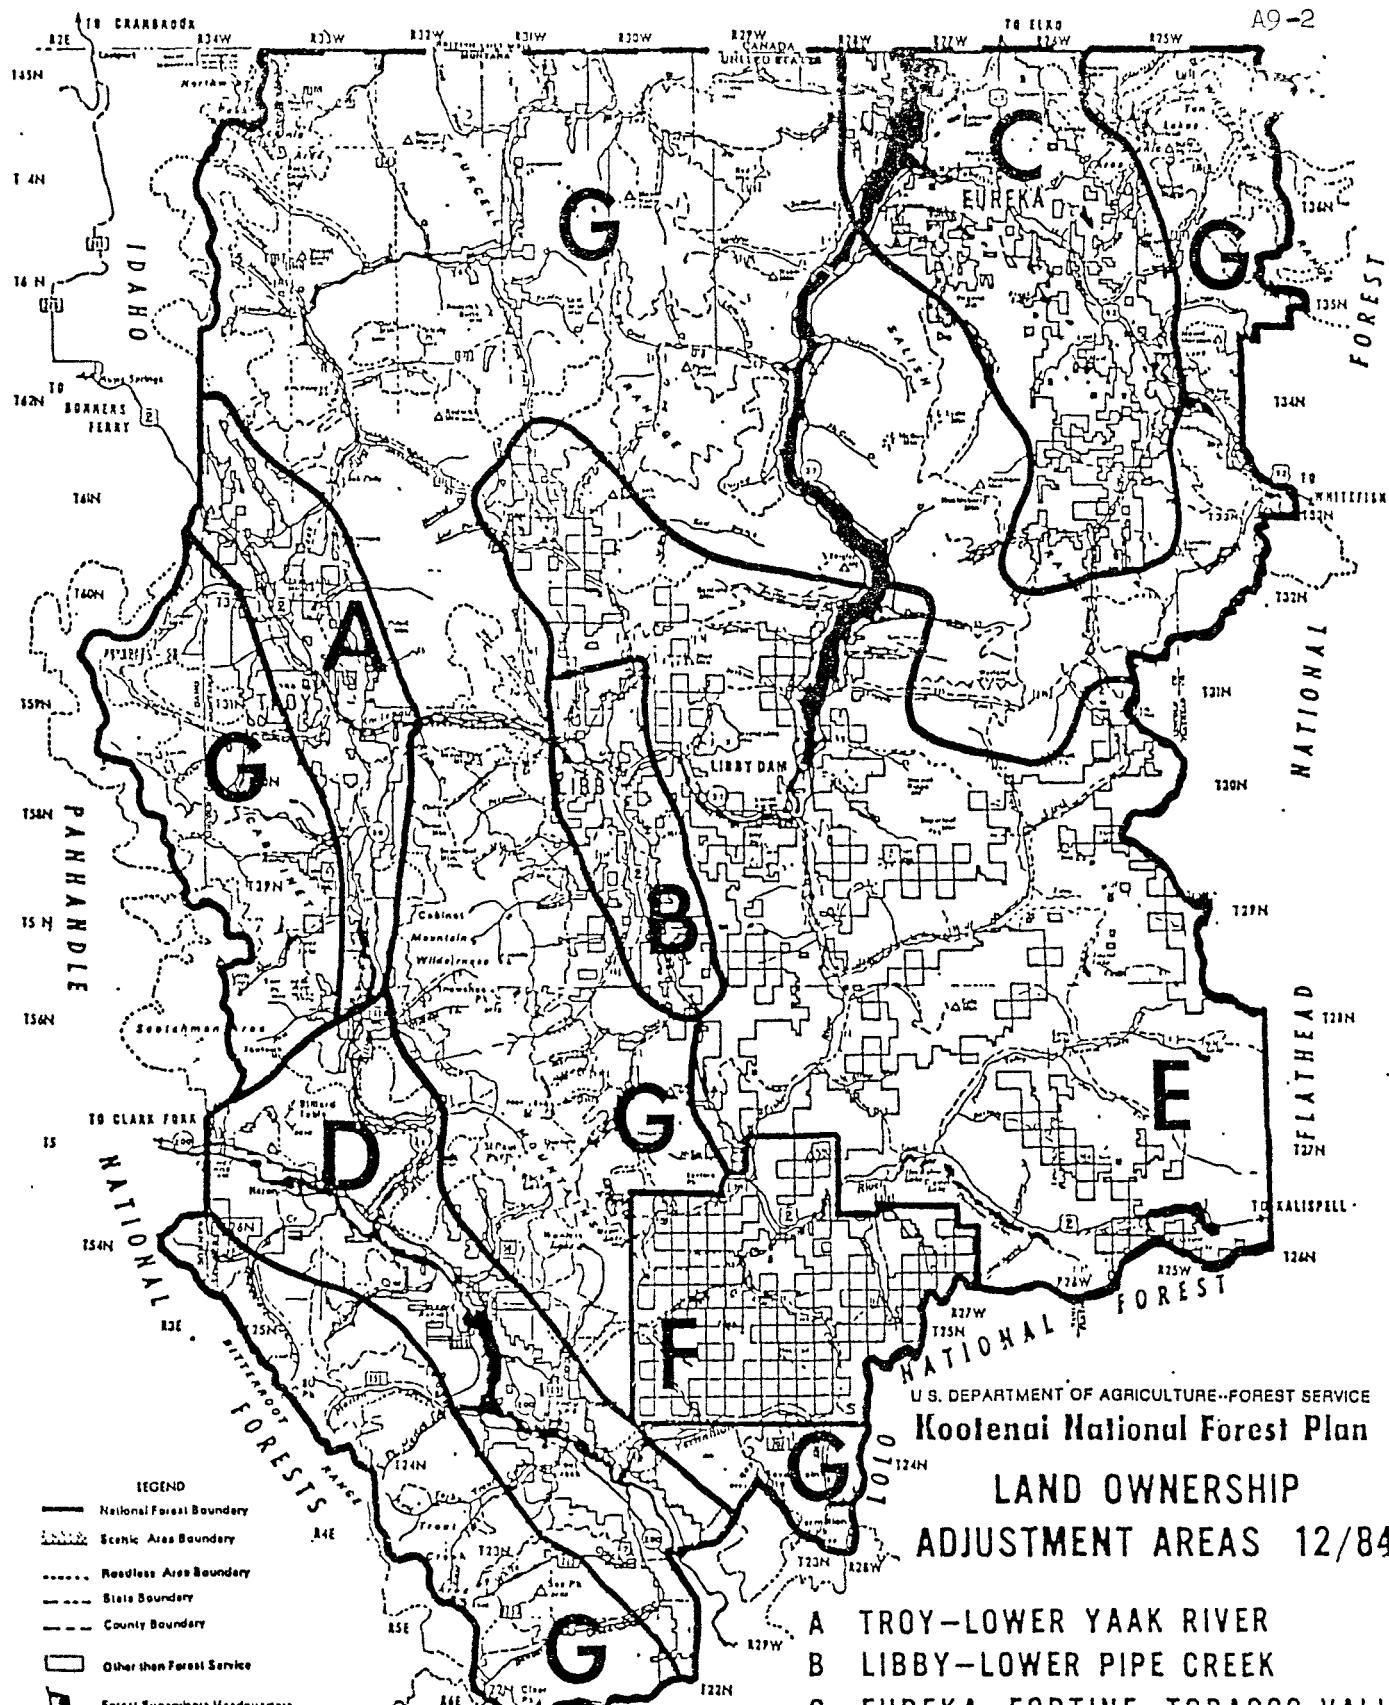

The landownership pattern on the Kootenai National Forest varies with location. The pattern can be characterized as (1) large blocks of uninterrupted, contiguous National Forest lands, (2) checkerboard situations with alternate sections of private and public lands, (3) isolated tracts of private lands surrounded by National Forest lands, (4) isolated tracts of National Forest lands surrounded by private lands, and (5) large blocks of lands owned by major corporate landowners.

The large blocks of major corporate lands and checkerboard situations are generally located in the southeastern quarter of the Forest. The largest concentration of noncorporate private lands is in the Eureka-Fortine area, the northeastern part of the Forest.

The other concentrations of private lands occur in the areas of Libby, Troy, Yaak River, Bull Lake valley, and the Clark Fork River valley.

Isolated tracts of private land surrounded by National Forest land occurs in various locations on the Forest. While there are other instances of National Forest lands surrounded by private lands, the majority of these situations are in the Eureka-Fortine area.

Checkerboard and isolated parcels of both public and private lands create problems of rights-of-way, trespass, title claims, encroachments, easements, cost-share roads, and other Forest management programs. At times, "management compatibility" problems can occur when adjacent lands are being managed for conflicting objectives, such as primitive recreation next to full timber production. Ownership adjustments and consolidation can correct some of these problem areas.

2. Landownership Adjustment Direction

BACKGROUND

Planning for landownership involves opportunities and responsibilities that extend beyond Forest Service generated activities on existing National Forest lands. Landownership adjustments must help meet resource management objectives and public needs. Decisions about landownership adjustments must be guided by the capability of the land to efficiently meet present and future demands for goods and services. These considerations were incorporated in the planning process.

The intent of the Landownership Plan program that follows is to display fewer land management objectives that are incompatible with those of other landowners. It is generally not desirable to propose and undertake a form of management on Forest lands that is in direct conflict with activities on adjacent private lands.

The Kootenai will provide for equitable consideration of private inholdings through development of:

1. Management options available for private land exchange or management of inholdings.
2. Access opportunities to private land for commodity extraction and uses, including recreation.

B. Landownership Adjustment Areas

The Forest has been broken into seven landownership adjustment areas with general landownership intentions set forth for each. The intentions are also a reflection of input from all corporate landowners, counties, the State of Montana, and numerous small and large landowners. The seven areas listed below are shown on the attached map, labeled Landownership Adjustment Areas. The tables of the specific lands listed as desirable for acquisition or disposal are shown beginning on page A9-9. All other lands are designated for retention.

1. Troy-Lower Yaak River, (Area A)

Ownership acquisitions will be pursued outside cities, towns, and developing areas such as active subdivisions. General intentions are to allow appropriate expansions of private holdings while elsewhere acquisitions chiefly will be aimed at improving public use for recreation and wildlife.

2. Libby-Lower Pipe Creek, (Area B)

Forest Service will generally not attempt any acquisitions in the area. Rather, the Forest will work with private landowners and Lincoln County to provide a suitable ownership pattern for private developments.

3. Eureka-Fortine-Tobacco Valley, (Area C)

In general, scattered smaller blocks of National Forest will be retained for public recreation and winter range for big-game wildlife and certain nongame species. Forest Service acquisitions will primarily be those which create more favorable access and/or use of public recreation opportunities and which provide critical wildlife habitat. A specific land adjustment program with the State of Montana will be pursued in T33N, R26W, (Upper Fortine Creek area) and next to the Stillwater State Forest to consolidate State holdings. Also, selected, isolated parcels of National Forest land in T35N and T36N, R26W, will only be disposed of to the State of Montana.

4. Clark Fork River-Bull River, (Area D)

National Forest land along the valley/National Forest edge will be available for disposal where not necessarily needed for management purposes. Acquisitions of private land will be aimed principally at picking up "opportunity" cases that will provide a direct benefit to the public (i.e., trail heads for access into the wilderness and which provide critical wildlife habitat along with access to timber for harvesting operations). The Bull River area will be the focus of efforts to acquire land in fee or through conservation easements that specifically benefit recreation, visual resources, and wildlife (especially grizzly bears).

5. Upper Pipe Creek-Fisher River-Wolf Creek-Pleasant Valley, (Area E)

These are "intermingled" lands with large corporate landowners and scattered small units of private land. Generally, the corporate landowners wish to consolidate their ownerships. The Kootenai will engage in land exchanges that have clear benefits to the public and provide better management options for the Forest Service. The Forest intends to dispose of National Forest lands in the Meadow Peak-Pleasant Valley and Fisher River and Snell Mountain areas and acquire lands in the upper Fisher River-Allen Peak areas for wildlife management (including grizzly bear), nonmotorized recreation, and old-growth timber purposes.

6. Upper Fisher-Vermilion-McGinnis, (Area F)

These are "checkerboard" lands with large corporate landowners. In the Upper Fisher area Plum Creek Timber Company would like to consolidate or totally divest themselves of their entire ownership. The Forest Service would be willing to acquire the lands in the checkerboard pattern because they would provide high public benefits in terms of hunting, recreation, wildlife, scenery, and watershed protection values. The area has mineral potential and acquisition/disposal opportunities will only be pursued where mineral development for public benefit is available. The logging costs in the area are prohibitive so limited loss of timber base lands is expected.

In the Sedlak Park to McGinnis Meadows areas Champion International is interested in some of the National Forest land. The Forest Service is willing to exchange certain parcels within about 3 miles of Raven Work Center but desires to retain the other National Forest lands.

7. Rest of Forest Not In "1" Through "6", (Area G)

Forest Service will attempt to acquire all private parcels in any Wilderness, Scenic Area, or other designated area. Outside those designated areas are scattered, generally isolated, small parcels of private land.

Exchanges and/or acquisitions will only be pursued on an opportunity basis where ownership would enhance the Forest Service's ability to provide greater public use or goods.

C. General Guidance

1. Exchanges should be of a size to ensure administrative efficiency and cost-effectiveness in case processing.
2. Where possible stay within the Flathead, Lolo, Panhandle, and Kootenai Forests.
3. Try to keep Federal and non-Federal lands within the same County, where possible, otherwise attempt to design a subsequent exchange to balance the acres over the program.
4. Select projects with a low probability of developing adverse public reaction or controversy.
5. Concentrate on lands within key resource areas such as wilderness, scenic areas, essential wildlife habitat corridors, etc.
6. Give major concern to areas having high wildlife values such as grizzly habitat and critical big-game range.
7. Try to deal with proposals that will assist management by reducing or eliminating areas with cost-sharing, difficult access, land line problems, trespass, encroachment, or costly timber stand management problems.
8. Give high consideration to scenic areas and landscape view zones .
9. Consider all known mineral deposits and their impact on a changed ownership.
10. Give major emphasis to maintaining a stable timber supply to local mills. Consider the effect of changed ownership and/or reduced volumes of timber to specific local areas.

11. Give importance to trading like/kind lands (i.e., low timber volume, wildlife, primitive recreation lands for similar lands). When a parcel with a key noncommodity resource is identified for acquisition by the forest, an attempt should be made to include it in a larger package to lessen the impact of exchanging noncommodity lands for timber lands on a project basis.
12. Provide recreation opportunities and access by enhancing the ability to develop a planned transportation system.
13. Help maintain hydrologic balance. Be responsive to fisheries needs and impacts.
14. Diligently pursue opportunities for exchange, purchase, or donation where such actions will be consistent with the intent of approved management prescriptions.
15. Look for opportunities to use Conservation Easements that acquire development rather than fee rights. If possible, try to obtain only those rights needed for National Forest management purposes and attempt to leave as much private land available as possible.

D. Specific Guidance by Landownership Pattern

The landownership patterns tend to fall into three basic groups. They are: (1) Checkerboard; (2) Intermingled; and (3) Other. For purposes of this Plan the following definitions will be used:

Checkerboard - Landownership pattern where National Forest System lands occur principally in alternate sections.

Intermingled - A variety of landownerships, including some small amounts of checkerboard and scattered patterns, where intermixed ownership occurs.

Other - Essentially solid blocks of National Forest land and designated areas such as Wilderness and Scenic Areas.

Checkerboard Pattern

As a general rule National Forest System lands intermingled in a checkerboard pattern with lands owned by large, private corporations may remain intact. Exceptions are in specific areas where landownership change is needed to respond to major public issues, management concerns, or to support resource management goals identified in the Forest Plan.

Intermingled and Other Patterns

Intermingled and other lands will be exchanged or purchased if they fit the following guidelines.

1. Legislative mandates.
2. Policy in the Forest Service Manual.

3. Landownership adjustments needed to meet community or other special needs when in the public interest.
4. Achieving a balance of resource uses from both public and private lands to best meet present and future local and national needs.
5. Protection and enhancement of the environment.
6. Administrative efficiency, including cost-effectiveness.

Specific Guidelines Applicable to all Landownership Patterns Will Be:

1. Classified wilderness--acquire all privately owned lands; do not dispose of National Forest System lands.
2. Recommended designated wilderness--National Forest System land will not be classified for disposal.
3. Inventoried roadless areas--acquisition or disposal of lands will depend on analysis in Forest Plan.
4. Congressionally classified and designated areas (other than wilderness) or administratively classified areas--achieve the ownership pattern necessary to preserve or enhance the values which established the classification in order to achieve the management objectives for the area.
5. National Forest System lands will not be disposed of when the action will significantly reduce the Northern Region commercial timberland base, or would adversely affect threatened or endangered species habitat.

LAND ADJUSTMENT ACRES - TOTALS BY ADJUSTMENT AREA

<u>AREA</u>	<u>DESIRABLE TO BE ACQUIRED</u>	<u>DESIRABLE TO BE DISPOSED</u>
A.	11,306.00*	3,149.50
B.	840.00*	5,599.00
C.	13,760.75	11,063.00
D.	16,737.00*	906.00
E.	9,665.00*	47,740.00
F.	30,251.00*	128.00
G.	<u>8,429.00*</u>	<u>336.00</u>
TOTAL	90,998.75*	68,921.50

* Additional lands may become desirable to acquire if Congress recommends any Wild and Scenic Rivers from among the available candidates (See Appendix 22).

Specific Tables of Proposed Lands Desirable to be Acquired or Disposed of by
Landownership Adjustment Area and the Reasons

The following are code letters defining the reasons for desiring disposal or acquisition of the lands shown in the following tables.

Note that these lands are all National Forest in character. However, some lands are significantly more suitable than others and land trades can be used to dispose of less characteristic lands for those that provide greater public benefits.

REASONS DESIRABLE
FOR DISPOSAL

<u>TYPE OF REASON</u>	<u>CODE LETTER</u>
Isolated Parcels	A
Low in Character as National Forest Lands	B
Management Problem	C
Trespass/Encroachment/Title Claim Problems	D
Improve Public Benefits By Being in State Ownership	S

REASONS FOR ACQUISITION

Area for Recreation Sites	A
Consolidation of National Forest Land	B
Water-Oriented Frontage	C
Isolated Private Parcel	D
Big-Game Habitat	E
Threatened or Endangered Species Habitat	F
Provide Public Access	G
Improve Timber Production	H
Essential Fish or Bird Habitat	I
Provide Substantially Improved Public/Mgmt. Usage	J
Mitigation or Protection of Cultural Resources	K
Primitive and/or Dispersed Recreation	L
Eliminate Costly Title Claims, Water Rights, Trespass, or Other Legal Problems	M
Provide More Cost-Effective Management Capability	N

NOTE: Certain National Forest lands will only be disposed of to the State of Montana. The reason is that the identified resource values on these parcels must be protected or be specifically managed and this requirement can be met by disposing of certain lands to the State but at the same time giving the State and the public an ownership pattern that is more manageable. These lands will have the code "S" on the lists that follow.
