

CHUGACH NATIONAL FOREST

SCHEDULE OF NEPA PROPOSED ACTIONS

April 1, 2001 – March 31, 2002

SUPERVISOR'S OFFICE

Forest Plan Revision

Location: Chugach National Forest, southcentral Alaska.

Description: The Forest is revising its Land Management Plan. The original Plan was completed in 1984. Changes to environmental, social, or legal conditions will be integrated into the revised Plan.

Scoping Status: Formal scoping commenced with the publication of the Notice of Intent in the Federal Register on April 21, 1997 (Volume 62, Number 76). Preliminary revision issues were identified in the first edition of the Revision newsletter. During the months of November and December 1997, public workshops were conducted throughout southcentral Alaska. Over 1,000 letters, containing over 3,000 comments, were received during the scoping period. Analysis of those comments was used to identify the significant issues. The significant issues have been described as 'situation statements' and 'Public/Agency Interests'. The Situation Statements involve Public interests, which may be mutually exclusive, with a range of possible ways for resolution. A summary of public interest and situation statements was sent out to participants on the revision mailing list. Management Area Prescriptions were developed in response to the situation/interest statements. Collaborative Learning workshops were conducted in March 1999, to seek input from the public for formulating draft alternatives. The prescriptions were applied to various areas around the Forest to develop a range of alternatives.

Analysis Status: There were 30 alternatives developed by the Forest Service, other agencies, and groups and members of the public. The Forest Service Interdisciplinary Team created eight draft alternatives. Individuals and group representatives of the public submitted twenty-two alternatives. On December 19, 1999, the Chugach National Forest Supervisor Dave Gibbons approved a range of six alternatives, A through F, along with the existing "No Action" Alternative to be analyzed in detail. From this range of alternatives, a single preferred alternative was derived. The draft preferred alternative map was completed, and posted May 2000 on the Chugach Forest Revision Website (www.fs.fed.us/r10/chugach/revision/). The draft EIS and revised Forest Plan were posted on the Revision Website in August 2000.

Decision Date: The Draft Forest Plan and Draft Environmental Impact Statement were released for public comment, and posted in the Federal Register on September 15, 2000, with the comment period running through December 14, 2000. Over 30,000 cards and letters were received during the comment period. Depending upon the number of changes that are required in the draft documents, the Final Plan and Environmental Impact Statement are scheduled for completion September 2001. The Regional Forester is the Responsible Official for the Revision of the Forest Plan.

Contact Person: Gary Lehnhausen, Forest Supervisor's Office, (907)-271-2560.

Oil Spill Trustee Council Project.

Location: Western Prince William Sound, Southcentral Alaska.

Description: The Auke Bay Laboratory, National Marine Fisheries Service proposes to sample approximately 120 beaches in Prince William Sound to determine the amount of *Exxon Valdez* oil residue remaining in the upper intertidal areas, and determine recovery trends. The sample sites were selected randomly from the more than 700 sites that were classified as heavily or moderately oiled by previous shoreline surveys. Pits (approximately 20 x 20 x 20 inches) will be excavated by hand at tide heights 6-16 feet. No pits will be in the vegetative zone above the high tide line or within the lower intertidal zone where biological production is greatest. Another 10 beaches will be chosen from those suggested by residents of the area. The number of total pits to be dug will be less than 10,000. After retaining a small amount of sediment to determine quantity and character of any oil in some samples, the pits will be refilled. Sampling will occur May through August 2001.

Scoping Status: Community meetings were held in Chenega Bay, Tatitlek, Cordova, and Valdez in March to discuss the project and ask residents to identify beaches of continued concern..

Analysis Status: In Progress.

Decision Date: The signing official is the Director of National Marine Fisheries Service, with an expected decision in Spring 2001.

Contact Person: Pat Harris, Auke Bay Laboratory, 11305 Glacier Hwy, Juneau, Alaska 99301 or pat.harris@noaa.gov, or Ken Holbrook, Chugach National Forest, 271-2819.
