

We oppose any snowmachine closures on the Iditarod Trail. By closing certain portions of the trail to snowmachining, it not only creates confusion for recreationalists but it will prevent a close a travel corridor from seaward to girdwood.

The FS's mission is multiple use--yet the Chugach continues to segregate users of the forest. At the very least, snowmachiners and skiers should alternate use of the entire trail every other year for example.

Thank you for the opportunity to comment.
