Dear Interested Party:

We have enclosed our Schedule of Proposed Actions report for the first quarter of fiscal year 2005. The quarterly schedule shows ongoing and upcoming projects by title. Project information includes project name and purpose, planning status, expected decision type and date, expected implementation date, and project description and location.

As you will notice, our schedule has a different look. The Forest Service is developing a national database to track key planning information; the database automatically generates schedules in a consistent manner. The attached schedule is an interim part of that effort. Work will continue throughout the summer, resulting in a final product with public access to the database this fall or winter.

Each project listed on this schedule has a different mailing list comprised of individuals who have indicated an interest in that specific project. If you want to receive further information about any Shoshone National Forest project, notify the project contact person shown on the schedule (telephone numbers and email addresses are shown on the schedule). You can also notify contact persons at the addresses listed below. When notified, the contact will add your name to the mailing list for all future information related to the project, such as the scoping letter, environmental assessment, decision document, and other National Environmental Policy Act documents.

The Shoshone has recently changed how project mailing lists are developed. Mailing lists by project category, e.g. timber harvest, livestock grazing, recreation, etc. will no longer be maintained or used to send out notices about project activities.
