

List of Tables and Figures

Table 1-1. Forest Plan Goals and Objectives Applicable in the Project Area	1-8
Table 1-2. Desired Future Conditions (DFC's) in the Project Area	1-11
Table 2-1. Alternative A: Livestock Grazing Currently Authorized	2-2
Table 2-2. Alternative B: Proposed Livestock Grazing	2-4
Table 2-3. Forest Plan Forage Utilization Standards	2-6
Table 2-4. Ability of Alternatives to Meet Purpose and Need	2-13
Table 2-5. Ability of Alternatives to Respond to Key Issues	2-14
Table 3-1. Harvested MI Species Crucial Range and Populations	3-5
Table 3-2. TEP Species Known or Suspected to Occur	3-11
Table 3-3. Intermountain Region Sensitive Fish and Wildlife Species	3-21
Table 3-4. Intermountain Region Sensitive Plant Species	3-30
Table 3-5. Perennial Streams that Support or Contribute to Fisheries	3-33
Table 3-6. Sensitive Stream Segments in the Project Area	3-36
Table 3-7. Expected-Use Matrix for Free-Ranging Domestic Cattle	3-37
Table 3-8. Expected-Use Acres for Allotments and Pastures	3-37
Table 3-9. Channel Characteristics of Roaring Fork Creek	3-38
Table 3-10. Channel Characteristics of Tosi and Klondike Creeks within Noble Pastures Allotment	3-41
Table 3-11. Channel Characteristics of Roaring Fork Creek within the Mud Lake East Pasture	3-43
Table 3-12. Channel Characteristics of Wagon Creek within the Mosquito Lake Unit Pastures	3-46
Table 3-13. Channel Characteristics of Tosi and Tepee Creeks within the Tosi-Tepee Unit Pastures	3-48
Table 3-14. Riparian Vegetation Composition by Allotment	3-50
Table 3-15. 2002 Aquatic Data Collected in Critical Areas	3-52
Table 3-16. Watershed Geomorphic Integrity Descriptions and Criteria	3-54
Table 3-17. Inland West Watershed Initiative Data for the Upper Green River and Gros Ventre River Watersheds	3-55
Table 3-18. Compaction Hazard Ratings by Allotment	3-57
Table 3-19. Summary Erosion Hazard by Allotment	3-58
Table 3-20. Existing Conditions – Authorized Livestock Grazing	3-65
Table 3-21. Percent of Available Forage Used by Livestock, Historic	3-70
Table 3-22. Indicators of Rangeland Health and Functionality	3-72
Table 3-23. Ground Cover Measurements for Key Sites and EUI data points	3-73
Table 3-24. Utilization and Stubble Height Measurements	3-76
Table 3-25. Noxious Weed Status within the Project Area	3-78

Table 3-26. Range Improvements in the Project Area	3-79
Table 3-27. Forest System Trails within the Project Area	3-87
Table 3-28. Visual Quality Objective Concerns within the Project Area	3-90
Table 4-1. Qualitative Comparison of Effects to Wildlife Habitat Components	4-9
Table 4-2. Past, Present, and Future Activities Occurring within the Upper Green Watersheds	4-10
Table 4-3. TEP Species Known or Suspected to Occur	4-14
Table 4-4a. Recommendations from the Guidelines for Grizzly Bear Control Actions in Response to Livestock Depredations	4-15
Table 4-4b. Management Guidelines to Address Nuisance Bears on Cattle Allotments Outside Yellowstone Grizzly Bear Recovery Zone in Wyoming	4-16
Table 4-5. Lynx Habitat by Allotment	4-19
Table 4-6. Summary of Potential Effects to Sensitive Species for Grazing Alternatives A and B	4-22
Table 4-7. Magnitudes of Potential Adverse Livestock Grazing Effects to Fisheries	4-24
Table 4-8. Annual Estimated Water Consumption by Permitted Livestock in the Upper Green River Allotments for Alternatives A and B	4-25
Table 4-9. Percent Bank Disturbance and Stability for Critical Areas	4-28
Table 4-10. Stubble Height Along Green Line and Visible Trampling of Stream Banks within Critical Areas	4-31
Table 4-11. Summary of Road Densities in Miles per Square Mile by Watershed	4-36
Table 4-12. Magnitudes of Potential Adverse Livestock Grazing Effects to Hydrologic Function	4-39
Table 4-13. Summary of Effects to Recreation, Transportation, Visual Quality, and Wilderness by Alternative	4-67
Figure 3-1. Wildlife Crucial Range in the Project Area	3-3
Figure 3-2. Distribution of Collared Grizzly Bears in the Project Area	3-13
Figure 3-3. Suitable Lynx Habitat	3-17
Figure 3-4. Existing Vegetation in the Project Area	3-67
Figure 4-1. Stream Bank Disturbance Compared to Bank Stability in Critical Stream Areas	4-30
Figure 4-2. Average Annual Net Cash Income Reduction for a Federal Land Ranching Operation with Reductions in Federal Grazing Permits	4-59
