

Proposed Revision Topics	Hiawatha	Huron-Manistee	Ottawa
Management Areas	Realign Management Area boundaries with ecological-based criteria; possibly combine some management areas.	Modify Management Areas to reflect changing demographics related to fire risk, rural development, and semiprimitive areas.	Align Management Areas with their inherent ecosystem capabilities.
Vegetation Management	Revise Plan direction to more closely match land potentials for vegetation.	No proposed changes.	Revise Plan direction to more closely match land potentials for vegetation.
Timber Output	Review current ASQ based on analysis of proposed changes to land suitability, MAs and vegetation objectives.	Calculate the long-term sustained yield; review non-chargeable volume to activities other than timber production.	Review current ASQ based on analysis of proposed changes to land suitability, MAs and vegetation objectives.
Threatened, Endangered, Sensitive and MIS species	Devise DFC, goals, objectives, standards and guidelines to address species viability. Evaluate and change MIS based on monitoring and new information.	Update plan based on species viability evaluations. Provide habitat conditions and protect resource values for sensitive species. Assess and revise MIS list.	Devise DFC, goals, objectives, standards and guidelines to address species viability. Evaluate and change MIS based on monitoring and new information.
Invasive Species	Propose editorial change to update management direction.	Incorporate editorial changes.	Develop standards and guidelines, monitoring and control of invasive species.
Old Growth	Reassess distribution/size of old growth.	No proposed changes.	Revise Plan direction for Old Growth and adjacent Forest stands.
Recreation	Provide direction for motorized/non-motorized lake accesses and rec. settings.	Evaluate new trail uses for consistency with FS recreation vision.	Establish standards and guidelines to minimize resource damage from ATVs.
Access	Revise Plan direction for motorized/non-motorized use of OHV's and trails.	Allow mountain biking on trails unless posted closed.	Consider allowing a designated ATV/ORV trail system.
ROS	Change 3 areas (Delia's Run, Boot Lake, Buck Bay Creek) from SPNM to SPM.	Changes to semiprimitive non-motorized and motorized areas.	No proposed changes.
Wilderness	Based on the initial roadless inventory, evaluate 1 area for potential wilderness.	No proposed changes.	Inventory and evaluate potential areas for wilderness.
Wild & Scenic Rivers	Incorporate 3 River Management Plans and final boundaries into the Forest Plan.	Extend AuSable River MA; place land on other rivers in "lands-in-holding."	Propose to amend the future Forest Plan.
Fire and Hazardous Fuels Reduction	No proposed changes.	Incorporate National Fire Plan and Forests' Fire Management Plan. Fuels management shall emulate natural fire regime.	Use fire to control invasive species in wilderness; guidance for fire prone ecosystems.
Minerals Development	No proposed changes.	Calculate Reasonable Foreseeable Oil and Gas Development; identify NFS lands which may be considered for lease.	No proposed changes.
Riparian Areas, Watershed and Soils.	Develop DFC, goals and objectives; revise standards & guidelines; incorporate State BMP's.	Incorporate aquatics ecological classification system; update guidance on vegetation attractive to beavers.	Develop DFC, goals and objectives; revise standards & guidelines.
Research Natural Areas	Review 18 current candidate RNAs.	Add 19 candidate RNAs.	Review current candidate RNAs.
